Park Safe
By - Aashi, Gautham & Vivek

Motivation

Vehicle thefts shot up almost 21% in San Francisco from April to May in 2020, compared with the same period last year

Goals

- Discover and model major factors leading to vehicle related crimes

- Suggest safe parking spots for driver looking to park

Methods

- Data Preprocessing

- Exploratory Data Analysis

- Feature Selection

- Predictive modeling

Plan of work

- Filter Vehicle related crimes

- Analyze Incident time and location demographics

- Build a predictive model to suggest safe parking spots
